Workshop

September 25-26, 2014
Jena
Germany

Deadlines

Abstract: June 15, 2014
Registration: September 1, 2014

Please visit the workshop website for more information:
www.image-based-systems-biology.com

The general experience that “a picture is worth a thousand words” also holds in the field of systems biology: *Image-based Systems Biology* is a modern approach that aims to extract spatio-temporal information contained in images in a form that it can be used to model morphological, functional and dynamical aspects of biological processes.

Researchers from all fields are invited to communicate their results focused on Image-based Systems Biology in order to exchange novel scientific methods and to share recent achievements from image-driven research in biology. Joint studies of experiment and theory will be highly welcomed. Furthermore, demonstrations of methods for accurate segmentation and classification of regions of interest or object-tracking that can be applied for high-content and high-throughput screening are of interest, as well as computational methods for translating images into mathematical models ranging from differential equations to agent-based methods.

Invited Speakers

Dr. Joost Beltman
*Netherlands Cancer Institute
Amsterdam, The Netherlands*

Topic: **Analyzing and modelling immune cell migration**

Dr. Till Bretschneider
*Warwick Systems Biology Centre,
University of Warwick, Coventry, United Kingdom*

Topic: **Mapping amoeboid cell migration**

Prof. Dr. Stephen McKenna
*Computer Vision and Image Processing,
University of Dundee, Dundee, United Kingdom*

Topic: **Automating the analysis of histopathology images**

Prof. Dr. Robert F. Murphy
*Lane Center for Computational Biology, Carnegie Mellon
University, Pittsburgh, PA, USA and Faculty of Biology, Albert
Ludwig University of Freiburg, Germany*

Topic: **Image-derived spatiotemporal models of subcellular
organization, differentiation and perturbation**

Prof. Dr. Jean-Christophe Olivo-Marin
*Bioimage Analysis Unit, Cell Biology and Infection Department
Institut Pasteur, Paris, France*

Topic: **Colocalisation analysis of biomolecules**

PD Dr. Karl Rohr
*Biomedical Computer Vision
University of Heidelberg, BIOQUANT Center,
German Cancer Research Center, Heidelberg, Germany*

Topic: **Tracking and registration for automatic
analysis of live cell image data**
